

# Asset Management as a Service (AMaaS)

with Rigby Capital

Our new Asset Management service provides you with a single view of your IT portfolio — complete asset level reporting functionality via our ‘always-on’ online portal, which can incorporate physical, virtual, financial and contractual aspects of all your technology estate.

This means you have one-stop-shop access to be able to view details including age, original purchase price or lease terms, in addition to their configuration and location, plus comprehensive monitoring including tracking of your complete portfolio.

## Core features

### Single view of all assets with Asset Manager browser

Simple user interface providing intuitive search and view functionality of all your assets across your IT ecosystem. The browser also provides a variety of data reporting views depending on the function or business need.

### Hardware and software asset management

Simplified asset tracking and management via a central repository providing an accurate view of your organisation’s IT infrastructure and aligns associated costs. This enables our customers to manage their end-to-end costs and asset depreciation, optimising TCO and ROI, in order to be able to make more informed business-related decisions and remain compliant.

### Easy charge-back, including cloud-based assets

Ability to track and expense associated costs, including capital and operational expenditure to relevant business units or cost centres, which provides increased cost recovery and visibility enabling future planning.

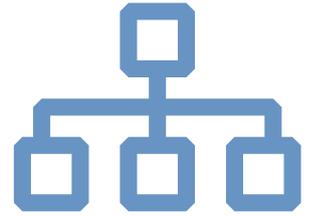

### Centralised contract management, providing a financial view of each asset

Simplification of your asset lifecycle management through the ability to view the number, type, variety and complexity of IT assets under contract management – from request and installation to retirement.

## What makes our service different?

Unbiased, brand and vendor neutral service **regardless of your original supplier** or lessor — and which works across all **hardware and software** solutions.

Additional benefit of a **dedicated contact** to help complete your initial set-up and data upload, along with ongoing support should you ever need them.

Variable pricing options — dependent on size of estate and asset type, based on a **'price per asset' per month**. Our pricing is transparent — with an option to opt-in to AMaaS if you are an existing Rigby Capital customer.

## About us

Recognising that the IT market is in transition — not least in terms of how businesses consume their IT services — Rigby Capital was established in 2015 to help our customers benefit from the economic impact of **consumption-based technology service solutions**, alongside traditional IT financing solutions.

With an experienced team at the helm and backed by one of the UK's most trusted family-owned public-limited companies, Rigby Capital prides itself on being **commercially oriented, transparent and unique in its approach** by helping address the challenges

of our customers. The team at Rigby Capital specialises in asset inclusive services payment structures and software aligned subscription models.

In the relatively short time since its inception, customer demand has validated the increasing requirement for this new approach to technology financing, and we have already built up a wide portfolio of customers across all industries and are working with a **growing number of business partners** — with plans for expansion into Europe.
